

IPAS

Infection Prevention Audit System

A new online audit tool
for High Impact Interventions...

- 
- Already used by NHS Trusts
 - Intuitive data entry
 - Comprehensive reporting
 - Advanced target management
 - Low monthly license fee

...more convenient & efficient auditing
of infection prevention procedures

IPAS is simple to deploy & easy to use

- IPAS can be mapped to your service ensuring all High Impact Interventions, trust sites, wards, and audit dates are specific to your requirements.
- Access IPAS via a standard web browser. Role-based permissions ensure access to IPAS is controlled and relevant to each user.
- The flexibility of IPAS allows both retrospective data input and real time updates.
- All care elements for individual HII's are simply recorded as completed, non-completed or not applicable.
- The unique dashboard enables users to review progress and monitor compliance performance against targets as each observation is recorded.
- All data and graphs are instantly updated following each recorded observation.

"Our own experiences in using an online tool for auditing HII's has seen a much improved performance in both the speed and accuracy of capturing and reporting all of our observation data..."

Comprehensive reporting & advanced target management

- Immediate DoH compliance reports across all user levels and trust locations including single and multiple wards, directorates, and whole trusts.
- Clear & concise graphs highlight compliance and trend data, ensuring all audits are automatically updated and can be viewed & analysed in a consistent way.
- The user friendly administration area fully supports a proactive approach to target setting.
- Management directives can be quickly implemented in response to local needs.
- New performance parameters can be added and reviewed across many levels.
- Observation targets and compliance thresholds can be efficiently implemented, and reviewed to improve performance.
- Licence IPAS for only £499 per month including hosting and unlimited users across the Trust.

...Having worked closely with North 51 on the development of IPAS I have no doubt that many acute trusts can enjoy similar benefits through the installation of IPAS."

*Wendy Creasy, Infection Prevention & Management Nurse.
